Steganography Lab 1

Setup
- Download and save the files from https://github.com/reelru/StegoDFA
- Make sure that 010 editor is installed on your machine (or your hex editor of choice)
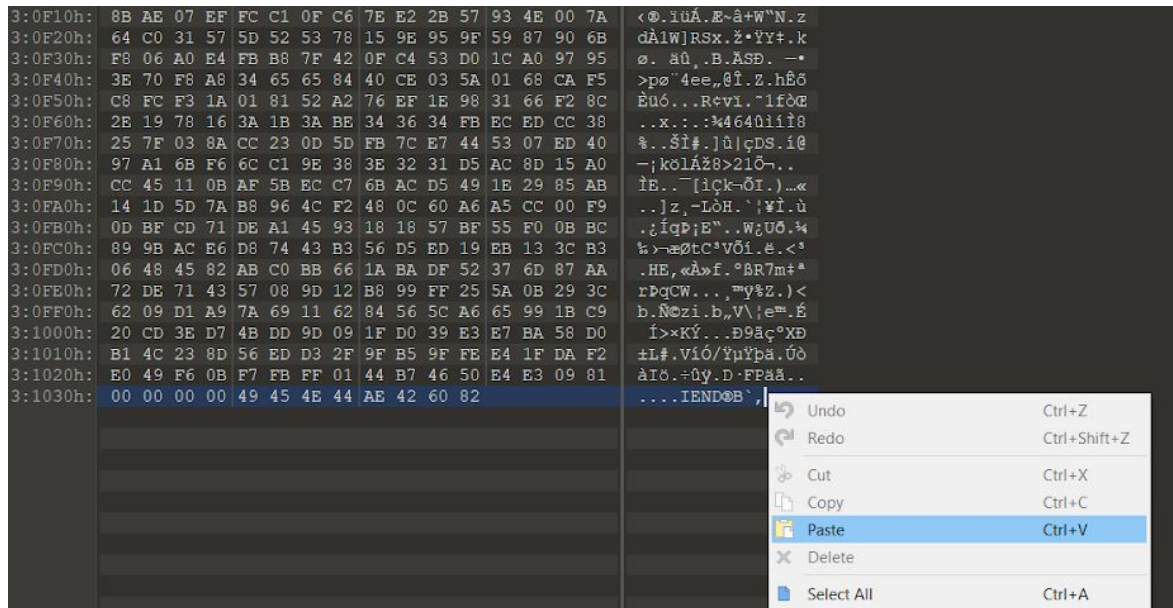

Hiding a file
- Open the image file in 010 editor
- Find the end of the file, after the hex "49 45 4E 44 AE 42 60 82"
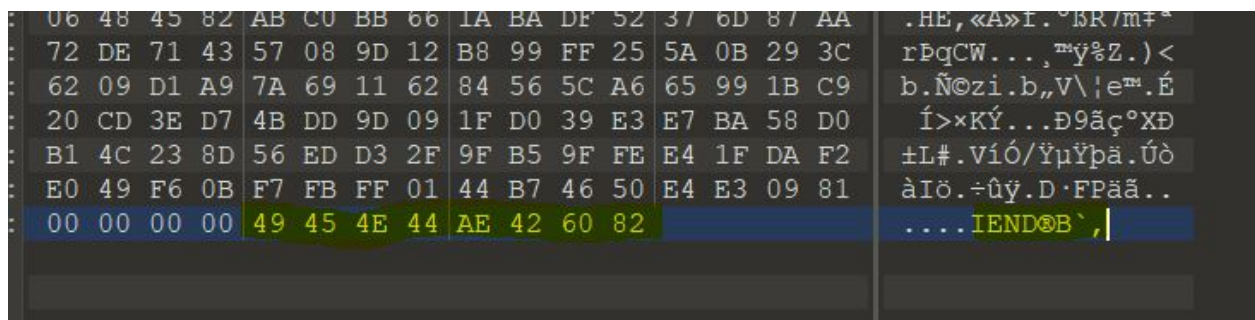

- Open a file of your choice in 010 editor
- Copy the hex of the file and paste it after the trailer hex of the image

|	
Undo	Ctrl+Z
Redo	Ctrl+Shift+Z
Cut	Ctrl+X
Copy	Ctrl+C
Paste	Ctrl+V
Delete	
Select All	Ctrl+A
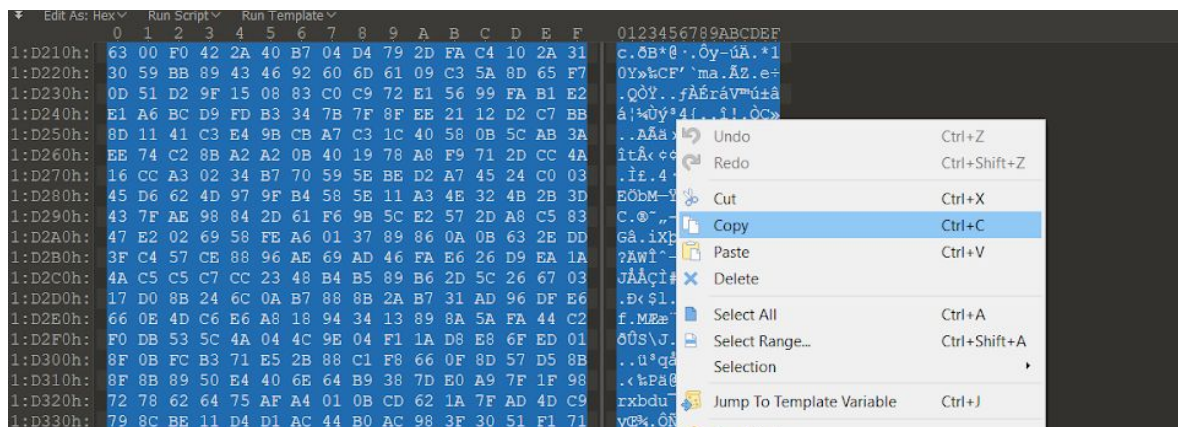

- Save the image
- If you open the image, nothing should've changed except the file size.

Retrieving a File
- Open the file in 010 editor
- By looking at the header in the file, determine what the file extension should be. ([psst...](#))
- Using the file type, find the trailer hex of the file.
- Create a new blank file using 010 editor, and copy the extra data in the file into the blank document.

| File | Edit | Search | View | Format | Scripts | Templates | Tools | Window | Help |

New	►	New Text File	Ctrl+N
Open File...	Ctrl+O	New Hex File	Ctrl+Shift+N
Open Drive...	Ctrl+D	New Unicode File
